

Jenny Menna

Jenny Menna is a Senior Vice President and Cybersecurity Partnership Executive at **U.S. Bank**. She leads collaboration initiatives with industry and government to advance the cybersecurity posture of U.S. Bank, and the financial sector as a whole. She also leads U.S. Bank's Information Systems Security Intelligence, cyber exercise, education and awareness, and Business Line Information Security Officer teams. Her industry leadership roles include the Global Cybersecurity Alliance Strategic Advisory Committee, the Financial Top Level Domain Board of Directors, the Risk Committee of Early Warning Services, and the Financial Services Information Sharing and Analysis Center's Threat Intelligence Committee.

Prior to joining U.S. Bank, Jenny held a variety of executive leadership positions in the Department of Homeland Security component responsible for securing federal civilian, state and local government and critical infrastructure networks, as well as for coordinating cyber incident response. Her responsibilities ranged from industry outreach to front-line operational and technical activities – including serving as US-CERT Director, to leading national-level policy initiatives. She received awards for her work under both the Bush and Obama Administrations, and the inaugural Excellence Award from the Multi-State Information Sharing and Analysis Center for her leadership in advancing state and local government cybersecurity. She was selected for the Senior Executive Service in 2009.

Jenny received both her Bachelors and Masters degrees from the University of Chicago, and was selected as Career Chairman and Board Member for their DC Alumni organization. She is a Certified Information Security Manager (CISM).
